- ASTM F1506 ARC thermal performance tested, UL Certified
- Available in sizes S-5X (36 - 64)

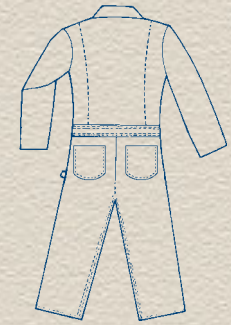

NOMEX® IIIA is a high temperature aramid fiber which is permanently flame resistant with excellent chemical resistance. Garments made from **NOMEX® IIIA** will not melt or drip when exposed to flames or arcs. **NOMEX® IIIA** is widely recognized as a premier fabric providing protection against the possible exposure to flame or arc.

INDURA® FRC

9oz.

- 7 double-stitched pockets: 2 breast, 2 rear, 2 hip, 1 tool
- One-piece back (action back)
- Pass throughs
- Hammer loop
- Non-sparking brass zipper closure with snaps on lapel and wrists
- Lock-down safety stitching throughout w/feld seam seat
- All stress points bar tacked
- Elastic in waistband
- Meets or exceeds, NFPA 70E, 1971, 1975, 1977
- ASTM F1506 ARC thermal performance tested
- F1002-continuous wear when intermittent exposure to molten metals are possible
- Available in sizes S-5X (36 - 64)

INDURA® FRC flame resistant 100% cotton fabrics are engineered to provide optimum performance for industrial protective clothing. Garments made from **INDURA® FRC** fabrics are guaranteed to be flame resistant for the life of the garment. **INDURA® FRC** provides a cost effective alternative to traditional durable FR fabrics with excellent protection against flame and arc.

Applications: Petrochemical, electric utilities, chemical, aviation, pharmaceutical, fire department, police department, military, foundries and flash protection.
